The easy answer for complex projects

Tighter teams, happier clients,
and a better bottom line.

Increase cooperation while keeping **budgets under control.**

On complex infrastructure projects, success depends on managing the flow of information. If your team can't keep the details and documents under control, projects won't stay at budget or on schedule—and you won't satisfy your most demanding stakeholders.

See your savings right now.

- Use our [capacity calculator](#) to see the time you could save by using the Aconex online collaboration platform to manage your project information.
- Learn strategies to improve your project results by downloading our [complimentary executive brief](#), *Strategies to Mitigate Project Risk and Maximize Return*.

The leader in online construction collaboration

Accountability, transparency,
and a get-out-of-court-free card.

Achieve compliance while **avoiding costly disputes.**

On complex infrastructure projects, you need a comprehensive information record—and a single source of truth—to prevent expensive disputes and litigation. Without a complete audit trail, you risk losing valuable project time, profit margin, and business relationships.

Learn strategies that leading firms are using to reduce risk and increase return, including how:

- A transit project reallocated a dispute team of 6
- An airport builder kept 70+ organizations in synch
- A mega-project team cut review cycle times by 68%
- A government contractor saved \$600K in overhead

The way construction collaborates

Collaboration, carbon credits, and cash.

Gain **big efficiency paybacks** while saving project costs, and the planet.

On complex infrastructure projects, operational costs can quickly eat away at margins. But online collaboration helps teams slash the impact of so many printed pages and last-minute shipping or travel — and work together more effectively.

Learn how leading firms reduce risk and increase return for big efficiency paybacks:

- A company reduced CO₂ output by more than 160K tons
- A mega-project team cut review cycles times by 68%
- A government contractor saved \$600K in overhead
